

Python for Data Analysis and Visualization

Claudia Carroll, TRIADS

Session 1

Session 1 In-class Exercises

1. Write the code to print each country in the data file `gdp_africa.csv` and that country's mean gdp between 1952 and 1982.
2. Now write the code to print each year in `gdp_africa.csv` and the mean GDP in Africa that year. How does your code differ from part one?
